# BACKLIGHT

Lo spessore estremamente contenuto di 6 mm insieme all'evoluta tecnologia consentono ad alcuni prodotti Ultra di poter essere attraversate da un fascio luminoso di adeguata potenza ottenendo la traslucenza del materiale.

The extremely reduced 6mm thickness, together with the advanced Ultra technology, allows an appropriately powerful band of light to travel through the Ultra slabs and backlight the material.

Die auf 6 mm extreme beschränkte Dünne, gepaart mit der fortschrittlichen Ultra-Technik, erlaubt es den Platten Ultra von einem ausreichenden starken Lichtstrahl durchdrungen zu werden und so den Durchlichteffekt des Materials zu bieten.

L'épaisseur extrêmement réduite de 6 mm associée à la technologie évolutive, permettent à certains produits Ultra, d'être traversés par un faisceau lumineux, d'une puissance appropriée pour obtenir la translucidité du matériel.
